Clinic Notes / Specifics:

History

Tech

Present for grooming.

XRecommendations

Tech

Monitor for signs of vaccine reaction. These include the development of itchy bumps or hives, swelling of the face (lip and/or eyelid margins), or respiratory distress. Observation of any of these symptoms warrants immediate treatment.

Mild lethargy, pain at the injection sites, and/or inappetence is/are common side effects following vaccination. These symptoms are not cause for concern unless they are severe or persist for more than 24 hours.

If your pet exhibits any other symptoms about which you are concerned, please call us for recommendations.

Plan

Dental Sanos applied

History

Tech

Sanos approved

Discharge Summary

Dental Prophylaxis

Jupiter had a dental cleaning today. As with any procedure under general anesthesia, your pet will require recovery time at home.

Activity:

Please try to keep Jupiter calm this evening. Restrict access to stairs and furniture this evening. Monitor your pet closely so he does not fall.

Diet:

Please only offer a small amount of water when you get home. Make sure your pet does not seem nauseous (i.e., drooling, licking/ smacking lips, vomiting). Wait about 20 minutes before offering a small amount of food. If your pet wants more food and seems to be feeling well enough, you can offer another small amount of food after waiting another 20 minutes. Jupiter can eat and drink normally the following morning.

Thank you for allowing us to provide **Jupiter** with the best possible care today. If you have any questions, do not hesitate to call.

Medication

Prescribed By: Dr. Tatiana Garzon, DVM 0.79 x Rimadyl (Carprofen) 50mg/mL Injection (per ml) *SQ*

Medication

Medication

Prescribed By: Dr. Tatiana Garzon, DVM 0.1 x Hydromorphone 10mg/mL Injection (per ml) *IM*
